

11 May 2026

**Dotlines Global Limited**  
(“Dotlines” or the “Company”)

**Admission to Trading on AIM**

Dotlines (AIM: DOTL), a UK-based international technology group operating in the telecommunications, digital infrastructure, cybersecurity and financial technology sectors, is pleased to confirm that, further to the Company’s announcement of 8 May 2026, its issued share capital has today commenced trading on AIM under the TIDM ‘DOTL’.

**Mahbubul Matin, Executive Chairman of Dotlines, commented:** “We are delighted to have commenced trading on AIM, which is a very proud moment for all of us at Dotlines. It represents the coming together of the two arms of our business – in Southeast Asia and the more recently established UK operations – and will provide a strong platform to facilitate our growth in the UK and internationally. We are excited to embark on this next phase of our journey, and we look forward to delivering on our strategy and generating value for our shareholders.”

**About Dotlines**

Dotlines Global Ltd (AIM: DOTL) is a UK-based international technology group operating in the telecommunications, digital infrastructure, cybersecurity and financial technology sectors. Founded in Malaysia in 2007 as a bespoke B2B software development business, it has since grown to offer a range of products, platforms and solutions for both B2B and B2C customers. Its two core areas of activity are digital content and services – principally, the Sohoj digital lifestyle platform for migrant populations in Malaysia, which has served over a million migrants from countries across Asia – and telecom products and services in the UK comprising: the Catena OSS and BSS software platform for internet service providers; Audra SME- and consumer-focused cybersecurity solutions; and the Carnival Internet full fibre broadband service.
